

Demystifying the Ford Foundation Fellowship Application
UCSB Graduate Division, Fall 2017
Monday, Nov. 13, 2017, 3:00 – 4:30pm
Student Resources Bldg., Multi-Purpose Room (MPR)

Ford Foundation Fellowship Applications

Mission Statement:

“Through its Fellowship Programs, the Ford Foundation seeks to increase the diversity of the nation’s college and university faculties by increasing their ethnic and racial diversity, to maximize the educational benefits of diversity, and to increase the number of professors who can and will use diversity as a resource for enriching the education of all students.” (Source: <http://sites.nationalacademies.org/PGA/FordFellowships/index.htm>)

Eligibility:

- All U.S. citizens, U.S. nationals, and U.S. permanent residents, individuals granted deferred action status under the Deferred Action for Childhood Arrivals Program, regardless of race, national origin, religion, gender, age, disability, or sexual orientation
- Individuals with evidence of superior academic achievement (such as grade point average, class rank, honors or other designations)
- Individuals committed to a career in teaching and research at the college or university level
- If eligible, you will be evaluated on a diverse array of “Selection Criteria.”
- Go to the Ford Foundation website and *familiarize yourself with those criteria as well as the other criteria*. The suggestions they provide are helpful and speak directly to how you will be evaluated. Pay attention to all components, especially the supplementary materials.

Predoctoral Fellowship: A three-year program for graduating senior undergraduates as well first- and second-year students in a doctoral program. You are eligible to apply as long as you have three years remaining before your oral exams or before you become ABD. You will be asked to submit a form verifying your status. Deadline: **December 14, 2017**, (5:00 PM EST), Supplemental Materials, **January 9, 2018**. Award: \$24,000.

http://sites.nationalacademies.org/cs/groups/pgasite/documents/webpage/pga_179065.pdf

Dissertation Fellowship: A one-year fellowship for doctoral candidates in their last year of dissertation research and writing (with the emphasis on the writing). Deadline: **December 7, 2017** (5:00 PM EST), Supplemental Materials, **January 9, 2018**. Award: \$25,000.

http://sites.nationalacademies.org/cs/groups/pgasite/documents/webpage/pga_179066.pdf

Postdoctoral Fellowship: A one-year fellowship for recent PhDs. It is meant to help junior faculty (usually in their second, third, or fourth years) to publish their first book and secure tenure. Candidates sometimes propose a second book but the goal is to help applicants dedicated to diversity obtain tenure. Deadline: **December 7, 2017** (5:00 PM EST), Supplemental Materials,

January 9, 2018. Award: \$45,000.

Ford Foundation “Perks”

All Ford Fellows are invited to attend the annual fall meeting where sessions on professional development are provided as well as opportunities to speak with publishers, gain professional insights and advice, and network with other current and former Ford Fellows. Later, you may be called (or volunteer) to lead workshops, speak at conferences, and participate in the review process of Ford applications. The Ford Foundation bills itself as the “Ford Family” and certainly that is the culture that is promoted (at least from the experience of many).

Components for All Applications

Personal Statement: How does your lived experiences in school, research, work, and/or life align with the mission of the Ford Foundation? Note: Your presence in the university or the nature of your project are *not* enough to qualify for diversifying the professoriate. You need to state explicitly how you contributed to the expansion of the K-12 college pipeline, to the undergraduate-to-graduate school transition for others, or to any other concrete issue pertaining to access to higher education and equity. This is not a “boo-hoo” statement, as a colleague once phrased it, but an explicit discussion of how you made it possible for other underrepresented people to achieve their educational hopes and dreams.

Statement of Previous Research: What previous research have you conducted and how did that research prepare you for your current proposed project? In your discussion you should outline your research methods, sources, and major findings, especially at the dissertation and post-doctoral stage. Reminder, don't just list your sources, data sets, or archives. Provide an explicit discussion of how you will use those sources or evidence. Additionally, at the advanced levels, you should discuss the emergence of your research agenda or research streams, lines of inquiry, and potential impact on the broader field.

Proposed Plan of Study: What does your research contribute to your field and why is that important? In other words, what does it add that we don't already know and why is that significant? What are the main questions and/or tentative findings or arguments of your study? And, how do you plan to address the central issues of the study? And, if possible, discuss your preliminary findings, which will show that you are prepared to undertake the work, particularly at the predoctoral level. At the dissertation level, you need to make a strong statement about what you have found and what kind of impact it will make. At the postdoctoral level, you need to emphasize the kind of impact your research is making or is about to make.

Letters of Recommendation: You will need at least three letters (five maximum, depending on application). If you are in graduate school, one must come from faculty adviser or at least one person from the current department. Ideally, find individuals with PhDs and those who know your academic work inside and out and can speak to the merits of your work. Be sure, if at all possible, that the individual can or will write a positive letter especially one that supports your research and your (background) story. Lukewarm or short letters hurt your case. Provide them with as much information as possible. Consider drawing up a “cheat sheet” or a talking points of

sorts. Since the letters of recommendation are not due until several weeks after your application is due, send the referees all of your materials. That will help them write a stronger, more thoughtful letter. Give them ample time. Do not irk them.

Dissertation Fellowships & Additional Materials

Annotated Bibliography: Select the top ten most relevant primary and secondary sources for your work. Begin your list with the primary sources. You might include three-to-four collections or data sets or materials that inform your work. Then you can list the top secondary sources that shape or have shaped your work. Spend two-to-three sentences explaining how those documents feed into your work and perhaps how you diverge, add to, perhaps revise, the interpretations.

Dissertation Completion Plan: Provide an overview (a timeline noting completion of chapters by months and year) of how you plan to complete the study, that is, what last-minute research (if any) and writing needs to be done. Be specific about your research questions. You might also provide names of chapters, if you wish, as well as restating and demonstrating that you will be *done* by the end of the fellowship year. Be sure, too, to discuss your findings or some of your findings. If you neglect to do so, the committee will assume you are NOT ready or prepared to complete your dissertation in the fellowship year.

Dissertation Abstract: Provide a succinct statement of your project, your major arguments or findings, your intervention in the literature and our knowledge more broadly, and sources consulted. The abstract, like your overview of your project, should have an opening statement that grabs the reader. Do not just duplicate the introductory paragraph of the plan of study and use it as the abstract. The committee has many applications to review. Plus, remember, take advantage of all the space that you have in the application.

Postdoctoral Fellowship Competition

Abstract of Proposed Plan of Study: As noted above, provide a succinct statement of your project, your major arguments or findings, your intervention in the literature and our knowledge more broadly, and sources consulted. The abstract, like your overview of your project, should have an opening statement that grabs the reader's attention.

Proposed Plan of Study and Long Range Career Goals: State your current or future employment plans and your goals for publications including the book for tenure as well as the second book project. Provide an overview (a timeline noting completion by months and year) of how you plan to complete the study.

Host Institution & Mentor: You will need to identify a mentor at a host institution who is willing to provide guidance during the fellowship year. They should be associate professors and, ideally, full professors who will be able to provide a strong letter welcoming your presence in their department. If possible, ask them to list the resources that will be available and, most importantly, how they, too, have contributed to diversifying the professoriate. Finally, be able to state how and why they make for an excellent fit with your scholarship and goals for diversifying the academy.

 - Zinsser, W. (1991). *On writing well*. HarperCollins Publishers.

Recognition of Past and Current Contributors

A big “thank you” to the panelists at the 2016 Ford Foundation workshop at UCSB's GSRC for their illuminating insights and practical tips. They include Professors Edwina Barvosa (Feminist Studies), Denise Segura (Sociology), and PhD Candidate Rosie Bermudez (Chicana/o Studies). Ester Trujillo, a former UCSB GradDiv Funding Peer, recent PhD, and current Assistant Professor at DePaul University, also deserves mention, as she too provided her insights on this process. We look forward to continued success!
